SACRAMENTO— California's population approached 37.7 million persons as of January 1, 2007, according to new population estimates released today by the state Department of Finance.

California, the nation's most populous state, represents 12.5 percent – one out of every eight persons – of the United States population. The state's population grew almost 1.3 percent in 2006 – adding close to 470,000 residents – mirroring the growth pattern of 2005. The state has increased by nearly 3.8 million persons – 11.2 percent – since the last census on April 1, 2000.

The report shows preliminary January 2007, as well as revised January 2006, population data for the state, cities, and counties. Highlights include:

California Cities:

- The 2007 report lists 478 California cities, of which 407 gained population, 3 experienced no change, and the remaining 68 lost population. Compared to Finance's previous report, more cities gained population and fewer cities lost population.
- In calendar year 2006, California cities annexed 14,851 housing units from county unincorporated areas, compared to 7,358 annexed units the previous year. This provided additional population to these cities during a down cycle in housing construction. In the previous report, the state added 197,627 housing units compared to 172,068 housing units this year.
- The city of Beaumont in Riverside County experienced the state's fastest growth rate at 21.2 percent. Beaumont gained 2,077 housing units primarily from new construction, and now has a total population of 28,250.
- Substantial increases in both new housing unit construction and/or annexations contributed to the growth of other fast-growing cities. The City of Imperial in Imperial County (16.6 percent), Lake Elsinore in Riverside County (15.4 percent), Porterville in Tulare County (13.9 percent), Lathrop in San Joaquin County (12.7 percent), and Lincoln in Placer County (11.0 percent) were the fastest growing cities following Beaumont. Porterville annexed a large number of housing units last year.
- Large numeric increases include Fontana in San Bernardino County (16,281), San Jose in Santa Clara County (15,757), San Diego in San Diego County (11,212), Bakersfield in Kern County (11,126) and Santa Clarita in Los Angeles County (9,527). All cities in this group added a large number of newly constructed housing units; Bakersfield and San Jose had small annexation activity; while Fontana and Santa Clarita annexed a large number of units.
- Los Angeles - California's largest city - has for the first time surpassed the 4 million mark with a population of 4,018,080. Los Angeles experienced the state's largest numeric increase of 37,658, and added 10,239 housing units.
- Since the April 1, 2000 census, the top four fastest growing cities have been Lincoln in Placer County (233.9 percent), Beaumont and Murrieta in Riverside County (148.2 and 119.6 percent respectively), and Brentwood in Contra Costa County (109.9 percent).

- Irvine in Orange County passed 200,000 in population, giving California 20 cities that exceed 200,000 in population.
- There are now 65 cities in California with a population exceeding 100,000. Victorville (102,538) in San Bernardino County and Carlsbad (101,337) in San Diego County have now joined this group.

California Counties:

- California's fifty-eight counties range in population from 1,261 in Alpine (east of Sacramento on the Nevada border) to over 10.3 million in Los Angeles.
- Compared to the state, twenty-two counties grew more rapidly, thirty-four grew more slowly, and two counties (Plumas and Sierra) experienced minor population decreases.
- The state's ten most populated counties remained the same: Los Angeles, San Diego, Orange, Riverside, San Bernardino, Santa Clara, Alameda, Sacramento, Contra Costa, and Fresno. This year, very slight population differences resulted in San Diego replacing Orange in second place and Riverside replacing San Bernardino in fourth place. All but Fresno have over one million residents. San Diego and Orange have over 3 million each while Riverside and San Bernardino each exceed 2 million.
- Los Angeles, the most populous county in the nation, accounts for over 27 percent of the state's population, and tops the combined population of the next four largest counties. Over half of the state's population resides in our five most populated counties, all in Southern California.
- All but one of the ten counties attracting the largest number of new residents in 2006 was also among the top ten in total population. Kern County added over 22,000 people to rank 7th among counties with the strongest residential growth. Contra Costa County, in the Bay Area, was not among the state's ten fastest growers though it added over 11,000 new residents and placed 11th.
- Imperial and Riverside counties grew by more than 3 percent during 2006. Kern, Sutter, Lassen, Madera, Yuba, Kings, Placer, Merced, Tulare, and Colusa counties had growth rates above 2 percent.

The population estimates are used in determining the annual appropriations limit for all California jurisdictions, to distribute state subventions to cities and counties, and to comply with various state codes. Additionally, estimates are used for research and planning purposes by federal, state and local agencies, the academic community and the private sector, and to construct incidence rates such as birth and death rates, college-going rates, and incarceration rates.

Changes to the housing stock are used to prepare the annual city population estimates presented in this report. Estimated occupancy of housing units and the number of persons per household further determine population levels. Changes in city housing stocks result from new construction, demolitions, housing unit conversions, and annexations.

A variety of summary administrative records is used to produce the state and county population estimates. Birth and death counts, driver's license address changes, total housing units, school enrollment, federal income tax returns, legal immigration data, Medicare, Medi-Cal, and other data are provided by the responsible federal or state agency. Data are reported in summarized data tables that do not disclose any information about individuals.

Related population estimates reports are available on the Department's website:
